THERMAL PERFORMANCE

Wayne Dalton participates in the DASMA Thermal Performance Verification Program. The program verifies the thermal performance of sectional garage doors. The lower the U-factor rating, the better the thermal performance.

Symbol indicates verified U-factor rating in accordance with the DASMA Thermal Performance Verification Program.

2501 S. State Hwy. 121 Bus., Ste 200

For selection of windows for each product refer to Window Guide. With any of the above configurations, some product options may have additional limitations. See product literature for additional details.
*Wayne Dalton uses a calculated door section R-value for our insulated doors.
**Total Pack doors include weather stripping for top and sides. Product size limitations depend on product series.
***See wind load documents on website for details. Actual colors may vary from brochure due to fluctuations in the printing process. Always request a color sample from your Dealer for accurate color matching before ordering your door.
†U-factor is independently tested and verified per ANSI/DASMA 105 using solid doors and specific product sizes.
